Explanation
In the table, high-risk pathogens (biosafety classification 3/4) and pathogens known from various biosecurity lists are listed in alphabetical order.
Name of agent: When several names are known for a pathogen, they appear in several places in the table. The other names of the agent are given in parentheses.
Biosafety Classification: the numbers indicate the classification. "-" means that the microorganism is not classified.
Biosecurity: "Yes" and "No" indicate whether or not the microorganism appears on the list. "W" means that the microorganism is not on the list, but serves as a warning.
